

ASTHMA UPDATE

Content:

An informative interactive workshop to look at recent up to date National guidelines on Asthma management .The course is suitable for any Health Professional who has undertaken any formal asthma training, asthma diploma, paediatric asthma diploma or asthma degree module in the past and wishes to update themselves on the latest guidance.

The course will enable a greater understanding on relevant recent guidance, diagnosis, treatment, acute asthma and chronic management including individualised self management.

The importance of treating allergic rhinitis, a common co morbidity of asthma, will be discussed in line with the updated ARIA guidelines (2010).

Course information:

This one day course is for all health professionals working with people who have asthma. It will give up to date information and is suitable for anyone who is currently in clinical practice and managing people with Asthma and who have previously had formal Education/Training on asthma and wish to update and consolidate their knowledge. Delivered by expert practising clinicians.
