ROUNDUP

APRIL 2024

'My
health,
my right'

WORLD HEALTH DAY

Every year, World Health Day shines a spotlight on a pressing global health issue that impacts people across the globe. This year's theme, 'My health, my right', champions the fundamental right of every person to access quality healthcare services, education, information, clean water, breathable air, proper nutrition, safe housing, decent working conditions and freedom from discrimination.

Despite health being recognised as a human right in at least 140 countries' constitutions, 4.5 billion people (over half the world's population) lacked access to essential health services in 2021, according to the World Health Organisation.

We offer a range of accredited courses for continuing professional development, covering long-term conditions. [Find an accredited course for your continuing professional development now.](#)

WANT TO LEARN MORE ABOUT ASTHMA?

In the UK, 5.4 million people live with asthma. While it might be a common long-term medical condition affecting individuals of all ages, asthma remains one of the leading causes of morbidity, placing a significant burden on patients, health services, and society.

Our **Asthma Foundation Course** offers a comprehensive overview of asthma and its impact on health and well-being across all age groups. Encompassing 15 hours of study time, this course can be completed online over two months. [Sharpen your asthma knowledge and expertise now by booking our course.](#)

REVIEW: CORONARY HEART DISEASE FOR PRIMARY CARE COURSE

Are you interested in learning about coronary heart disease? [Discover our online course that this practice nurse from Doncaster thoroughly enjoyed taking.](#)

CONSOLIDATE YOUR SPIROMETRY SKILLS WITH A FACE-TO-FACE CONSOLIDATION DAY!

We understand the value of online learning, but some people prefer the in-person support of a classroom setting. That's why we're offering a Spirometry Consolidation Day training specifically designed for those who've undertaken our eLearning course.

WHAT TO EXPECT:

- **Review and reinforce your knowledge:** This session will help you truly grasp concepts learned online, with case studies and practical examples to bridge the gap between theory and real-world application.
- **Peer-to-peer learning:** Gain valuable insights and share experiences with fellow learners in a supportive environment.
- **Flexible agenda:** We tailor the program to your needs, ensuring it complements your online learning journey.

LEARNING OUTCOMES:

By the end of the day, you'll be able to:

- Identify gold-standard spirometry techniques meeting ARTP quality criteria.
- Understand equipment preparation and limitations.
- Confidently apply your knowledge in real-world situations.
- Systematically evaluate spirometry traces for accuracy.
- Distinguish between reporting and clinical interpretation of results.
