

ROTHERHAM RESPIRATORY

ROUNDUP

AUGUST 2024

RCPCH Endorsed
Royal College of
Paediatrics and
Child Health

HAVE YOU APPLIED FOR OUR EDUCATIONAL FUND YET?

This time, we're giving you the opportunity to get our Advancing Paediatric Asthma Course for free!

As part of our Educational Fund, we fully fund your course so you can access the education you need to provide the best patient care and advance in your career.

What are you waiting for? [Send us your application for your chance to get our Advancing Paediatric Asthma Course for free.](#)

FACE-TO-FACE SPIROMETRY UPDATE DAY

This one-day course is designed for healthcare professionals who have already received spirometry training, whether you're an experienced practitioner or just need a refresher. This study day will equip you with the confidence to perform accurate and effective spirometry across all age groups.

What you'll gain:

- **Sharpen your skills:** This interactive session revisits key aspects of performing and interpreting spirometry for both adults and children.
- **Master the 7 steps to success:** Learn our proven method for consistently achieving high-quality, reliable spirometry traces.
- **Stay compliant:** Gain the latest information on ARTP (Association for Respiratory Technology and Physiology) certification requirements.

Learn more about learning outcomes, content outlines, suitability and cost over on our website by clicking [here](#).

WEB SEMINARS NOW AVAILABLE!

Interested in expanding your knowledge from the comfort of your home? We now share all available web seminars over on our website. Check out the page and register to join us! [Click here to find out more.](#)

COMING SOON: ADVANCING CHD COURSE (ONLINE)

Coming later this month, our new Advancing CHD Course is suitable for anyone who would like to develop their knowledge and understanding of the diagnosis and management of coronary heart disease (CHD).

It covers risk factors, assessment, and acute and long-term management of CHD, including blood pressure and lipid management, through lifestyle and pharmacological interventions.

The focus of the course is on the prevention, diagnosis and management of acute and chronic coronary syndrome through an evidence-based approach, which includes pharmacological and lifestyle interventions.

HERE AT ROTHERHAM RESPIRATORY, WE TAKE OUR SOCIAL RESPONSIBILITY SERIOUSLY.

We're in the fortunate position of being able to improve the lives of patients, healthcare professionals and communities up and down the country. **Here's how we like to do it:**

- Empowering healthcare professionals through affordable, high-quality educational courses.
- Funding weekly activities to help NHS patients manage their conditions and improve their quality of life.
- Supporting communities and wellbeing through our sponsorship of local initiatives such as the Wildcats Girls' football team.
- Using our Educational Fund to offer funded places on our courses and help even more healthcare professionals enhance their skills.
- Recognising excellence by sponsoring awards to celebrate achievements in healthcare.

By making ongoing commitments like these, we're able to play an integral role in creating a stronger healthcare system and empowering local communities to achieve more.

For more information on how we like to demonstrate our social responsibility, [click here.](#)
