

ROTHERHAM RESPIRATORY

ROUNDUP

SEPTEMBER 2024

WE'VE NOW HELPED OVER **25,000 STUDENTS** WITH THEIR HEALTHCARE EDUCATION!

Rotherham Respiratory is a leading provider of respiratory and long-term condition education, with a rich history spanning over two decades. Our expertise lies in delivering evidence-based education programmes tailored to healthcare professionals, conducted by experienced clinicians at the forefront of their fields.

By offering practical, clinically-relevant courses, we empower healthcare professionals to deliver exceptional, patient centred care to individuals living with long-term conditions. Our commitment to excellence ensures that our learners gain the knowledge and confidence needed to make a positive impact on patient outcomes.

*Here's to the next two decades and
25,000 students!*

WE'RE GOING TO THE PCRS CONFERENCE

You can find us at the [PCRS conference](#), The UK's leading respiratory conference for clinicians working primary, community and integrated care in Telford on 19th – 21st September.

The Primary Care Respiratory Society (PCRS) promotes better care and outcomes for people with respiratory diseases. It unites healthcare professionals in a supportive, inclusive community where every voice is heard, emphasising leadership and education.

The conference's packed programme is designed by a multi-disciplinary team of general practice, community and integrated care respiratory experts. Join us for:

- Thought-provoking, interactive and inspiring keynote plenary presentations
- Patient-centred, essential clinical updates, key service development and commissioning sessions
- Scientific research presentations, and practical workshops.
- Fantastic networking and personal development opportunities.

This conference, with well-known and expert speakers, is for GPs, nurses, pharmacists, physios, paramedics, and any HCPs interested in improving outcomes and best practice for patients with respiratory conditions in primary, community and integrated care settings.

ADVANCING PAEDIATRIC ASTHMA COURSE (AS PART OF OUR EDUCATIONAL FUND)

Due to an overwhelming number of applications to our educational fund we have decided to award 60 places for the Advancing Paediatric Asthma Course (as part of our Educational Fund). Everyone selected has now been contacted.

Congratulations to everyone who has been awarded a fully funded place, we would like to thank everyone for dedicating their time to apply.

Don't worry if you weren't chosen; we'll be reopening our Education Fund soon with a new course. Keep your eyes peeled on our socials and website for the announcement.

"The Advancing Paediatric Asthma Course course is all about supporting the NHSE to deliver the best possible care to children with asthma and their families; it is brilliant that the educational fund has given more healthcare professionals the opportunity to learn and develop their practice in managing children's asthma"

- Viv Marsh, Asthma Tutor.
